COMPANY OVERVIEW

Building practical software for African organizations

MylesCorp Technologies builds focused, AI-enabled software products for schools, school transport teams, and growing businesses. Our work is designed for local operating realities: mobile-first workflows, M-Pesa readiness, clear reporting, secure access, and hands-on implementation support.

Our current public product suite is intentionally focused: EduMyles for school management, EduRyde for student transport, and MylesCRM for business growth. Each product is supported by onboarding, training, data migration guidance, and post-launch support.

PRODUCT SUITE

Products

EduMyles - School Management

A complete school operating system for admissions, student records, CBC and 8-4-4 gradebooks, M-Pesa fee collection, attendance, parent communication, staff permissions, report cards, timetabling, and compliance reporting.

EduRyde - School Transport

A school transport safety platform for buses, drivers, routes, stops, boarding records, emergency alerts, vehicle compliance, and parent notifications.

MylesCRM - Business CRM

A CRM and business management platform for leads, contacts, deals, invoices, payments, customer service, marketing, inventory, tasks, and reporting.

PLAN OPTIONS

Published product pricing

The plan information below is included for easy comparison. Final commercial terms are confirmed in the proposal or signed agreement after scope, onboarding, users, integrations, and support requirements are reviewed.

Product	Plan	Price	Best for
EduMyles	Starter	KSh 12,900/month	Small schools getting started
EduMyles	Professional	KSh 38,900/month	Established schools needing full operations
EduMyles	Enterprise	Custom	Multi-campus or custom school groups
EduRyde	Starter	KSh 3,000/month	Up to 2 buses
EduRyde	Professional	KSh 7,000/month	Up to 8 buses
EduRyde	Enterprise	KSh 15,000/month	Unlimited fleet
MylesCRM	Starter	KSh 3,500/month	Up to 3 users
MylesCRM	Professional	KSh 10,000/month	Up to 15 users
MylesCRM	Enterprise	KSh 25,000/month	Unlimited users and AI features

Annual payment options, implementation scope, custom integrations, data migration, and enterprise support are confirmed during consultation.

SERVICES

Professional services

Service	What it covers
Product implementation	Configuration, workflows, users, permissions, records, imports, launch readiness, and admin setup.
Training and adoption	Practical training for administrators, teachers, transport teams, sales teams, and daily users.
Website and web app delivery	Professional websites, portals, dashboards, SaaS interfaces, and operational web applications.
Cloud, hosting, and IT advisory	Cloud readiness, hosting, DNS, SSL, backups, monitoring, security, procurement, and roadmap support.
Support and optimization	Post-launch support, reporting improvements, troubleshooting, and adoption reviews.

DELIVERY APPROACH

How we help teams go live

1. Discovery

Confirm goals, users, workflows, existing records, reporting needs, and success measures.

2. Configuration

Set up modules, permissions, records, routes, pipelines, reports, and integrations where applicable.

3. Data preparation

Clean and organize existing data for import into the selected product.

4. Training

Train administrators and everyday users with practical scenarios.

5. Launch and optimize

Go live with support, then improve reports, workflows, and adoption over time.
